**Sugar Rush: Sweet Rescue (Attraction)
Grand Opening: April 15, 2027**

Sugar Rush: Sweet Rescue is the world’s first attraction themed to the Disney Animation film *Wreck-It Ralph*.

King Candy, who is plotting to take over the world of video games, has set his sights on “Sugar Rush,” a candy-themed racing game. He has transformed the confections throughout the world of Sugar Rush, including gumdrops and ice cream, into Sugar Bugs programmed to consume the entire kingdom.

Guests will enter the colorful world of the game and join forces with Ralph, Vanellope and their friends as they travel through a variety of scenes, working to restore the Sugar Bugs to their original “kawaii” forms before they can destroy the candy-filled world. New music composed and recorded by Henry Jackman, the composer of *Wreck-It Ralph*, will further immerse guests in the adventure.

Using scanners installed in the ride vehicles that transport them into the game, guests must work together to defend Sugar Rush from King Candy. Points are earned based on factors such as the types and number of Sugar Bugs restored. Guests can view their results on the display in each vehicle and, for a limited time after the experience, on the Tokyo Disney Resort App. Photos captured during the experience will also be automatically added to My Photos on the App and available for purchase.

Guests can look forward to Sugar Rush: Sweet Rescue, an interactive, ride-through gaming experience for children and adults alike.

Notes:

- To view your photos and results on the Tokyo Disney Resort App, guests must launch the App and enable Bluetooth on their own smartphone before experiencing the attraction.
- Photos automatically added to My Photos may be selected and purchased through the App or the online purchase site for 30 days from the date they are taken.
- A Standby Pass (free of charge) or Disney Premier Access (for a fee) may be required to experience the Sugar Rush: Sweet Rescue attraction.
